

In the claims:

Cancel claim 26 without prejudice.

Add the following claim:

27. A method for securing at least one magnet (8) to a carrier element (5), comprising the steps of using at least one restraining element (14) outwardly formed as a single piece with the carrier element (5); disposing the at least one magnet outwardly on an inwardly displaced peripheral surfaces in the carrier element (5); engaging the restraining element (14) form-lockingly in notches (16) in the at least one magnet (8); bending the at least one restraining element (14) by the action of force so that the magnet (8) can be situated on the carrier element (5); and removing the action of force so that the restraining element (14) then grips the magnet (8).
